384. Ready. Set. Pipette!

384 well pipetting made easy

NEW: 16 and 24 channel pipettes and epT.I.P.S.® 384

16 and 24 Wells in Just One Step

Pipette into 384-well plates without the pain

Do you work with 384-well plates and strive for more efficient manual pipetting methods? Your worries are over.

Eppendorf's new 16 and 24 channel pipettes and epT.I.P.S.® 384 make working with 384-well plates convenient, ergonomic and safe.

Fill 384 wells within a minute

- > No more mistakes or tedious work due to inconvenient alternate well pipetting with 8 and 12 channel pipettes
- > Set up or validate an automated process manually, and have a back-up system in case automation fails
- > Increase your throughput today and change from 96 to 384-well plates. There's no reason to hesitate anymore!

SOFTeject tip ejection

- > Successive tip ejection without perceptible delay
- > Tip ejection forces reduced by 50%

Channel indicator

- > First and last channels are labeled
- > Use the pipette in the same orientation – all the time

Spring-loaded tip cone*

- > Minimizes tip attachment forces
- > No rocking or banging needed
- > Haptic feedback indicates perfect and reliable tip fit

Rounded tip cones

- > Glide easily into all 16 or 24 tips

epT.I.P.S. 384 with SOFTattach technology

- > For smooth and even tip attachment, and ejection, reducing operating forces
- > New dimension of tip fit and tightness
- > Perfect tip alignment by extraordinary coaxiality
- > Extremely fine tip shape to perfectly hit all 384 wells

Get the 16 and 24 channel pipettes in our gold standard Research plus or in our efficient electronic Xplorer plus models.

*1 available for all Eppendorf pipettes up to 1 mL

Ergonomics – Practiced Innovation

epT.I.P.S. 384 with SOFTattach technology – the key innovation

For the first time, pipette tips have elastic forming grooves. They allow the tips to stretch as much as necessary to enable a perfect seal while operating forces are reduced to a minimum.

Your benefit:

- > Outstanding and reliable tip fit and tightness
- > Reduced tip attachment and ejection forces

Applications for 384 Well Plates

1 From reagent reservoir to 384-well plate

2 From 384 to 384-well plate

3 From 384-well plate to agarose gel

- > Biochemical assays
- > Cell based assays
- > Immunoassays
- > Storage of biological samples or chemical compounds

- > Nucleic acid based methods
 - Amplification
 - Loading of agarose gels
 - Purification
 - Quantification
 - Sequencing

Spring-loaded tip cone for ergonomic and safe work

- > Reduced tip attachment force
- > Haptic feedback indicates reproducible and safe tip fit
- > Uniform uptake of liquid

SOFTject for reduced tip ejection force

During a single tip ejection stroke, the outside tips eject before the inside tips. This reduces the tip ejection forces by 50%.

Workflow

Complete Solutions from Eppendorf

As a solution provider, we offer 384 well formats with our microplates, thermocyclers, thermomixers, centrifuges and services to complete your 384 well workflow demands. More information about our workflow solutions on: www.eppendorf.com

Ergonomics – Then and Now

Always focusing on scientists' needs

To sustainably support the health of our customers, Eppendorf introduced the PhysioCare Concept®. Our philosophy is to continuously listen to scientists' needs while challenging the status quo of existing tools. Eppendorf has surpassed themselves once again with the new system for 384-well plates by combining proven concepts with new innovations:

The already proven features, the **spring-loaded tip cone** and **SOFTject**, were combined with a further innovation – epT.I.P.S. 384 with **SOFTattach** technology. All these features combined ensure greater user safety and ergonomics at work:

- > Tip attachment – even and reliable
- > Tip ejection – smooth and easy
- > Per tip cone, attachment and ejection forces are significantly reduced
- > Perfectly aligned tips ensure safe plate maneuvering and liquid transfer

www.eppendorf.com/physiocare

Superior ergonomics

Ergonomic operation and energy saving. Reduced ejection forces and 40% lower tip attachment forces per cone:

- > **New epT.I.P.S. 384 with SOFTattach technology:** outstandingly smooth and even tip attachment
- > **Spring-loaded tip cone:** with haptic feedback there is no need for rocking and banging, one gentle touch, and done
- > **SOFTject:** 50% reduction of ejection forces by successive tip ejection

Reproducible results

High level reproducibility and user safety:

- > **Start 16 or 24 reactions simultaneously:** for equal starting conditions
- > **SOFTattach technology and optimal pipette-tip compatibility:** for reliable tip tightness
- > **Perfectly aligned epT.I.P.S. 384:** for safe plate maneuvering and liquid transfer

Time-saving

Alternate well pipetting with 8 or 12 channel pipettes is a thing of the past:

- > **In just one step:** process complete columns or rows with 16 and 24 channel pipettes
- > **Protects from accidental well misidentification and repeating of experiments**
- > **Improve efficiency with 384-well plates:** 50% reduction in pipetting steps by processing one 384 instead of four 96 well plates
