

Chromatography Focus

Reid Bioanalytical Forum Hits Town

First Circular
18th International Reid Bioanalytical Forum
 6-9 July 2009 University of Surrey, Guildford, UK
 Presented by the Forum Syndicate
 of the Chromatographic Society
www.chromsoc.com

The Reid Bioanalytical Forum will be held as usual at the University of Surrey, Guildford, UK between the 6th and 9th July 2009. Presented by the Forum Syndicate of the Chromatographic Society this will be the 18th in the ever popular series of meetings.

The meeting will feature sessions covering the usual eclectic mix of new technologies, method development and validation together with regulatory aspects and emerging trends in bioanalysis.

Various packages to suit the requirements of attendees on limited budgets and/or time frames are available with options for 1 or 3 day passes all of which include accommodation, meals, refreshments, conference dinner and for those attending on Monday 6th an invitation to join the trip to a local vineyard. More details can be found at www.chromsoc.com/events. Early bird discounts are available for bookings made before May 20th.

The provisional programme includes the following session themes;

Monday 6th July (pm only)

MIST and associated topics

Tuesday 7th am

UHPLC, Halo columns and Green methods of analysis

Tuesday 7th pm

Regulatory issues from FDA, Bloodspot analysis

Wednesday 8th am

Immunoassays and Biomarkers

Wednesday 8th pm

Validation and Method Development

Thursday 9th (am only)

MS of biological analytes.

Programme

Contributions to the programme are still sought from those wishing to make either oral or poster presentations. The scientific committee can be contacted by via Howard Hill (hillh@ukorg.huntingdon.com)

Exhibition

Details for potential exhibitors may be obtained from Ian Wilson (ian.wilson@astrazeneca.com)

Sponsorship

A range of options are available for sponsorship at the meeting. For details contact John Lough (john.lough@sunderland.ac.uk)

“The meeting will feature sessions covering the usual eclectic mix of new technologies, method development and validation together with regulatory aspects and emerging trends in bioanalysis”
